Product description

• The combination of the compact dimensions (only 1,22 m (4.00 ft) width) and a 90° steering angle promises maximum flexibility

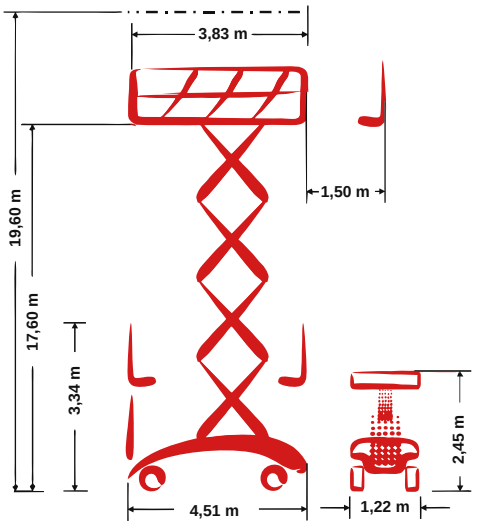

• An electro-hydraulic drive ensures even during long working cycles the necessary power reserves

• The proportional control for all functions of the working platform (driving, lifting, lowering) guarantee precisely and smooth operations

• Via touch of the button the working platform levels thanks to the patented PB support system automatically within a few seconds in an absolute safe position

• Thus the scissor lift is also suitable for inner-city operations on common sidewalks and at tight spaces – and this with a working height of 19,60 m (64.30 ft)
